

Vermaport®

Cart Conveyors

The Vermaport® can move between 600-800 shopping carts an hour, whereas a passenger lift moves around 111 per hour, carrying 2 carts per journey

The Vermaport® can be used in parallel and adjacent to an escalator or a fixed staircase, without the need for supervision or direction from in-store personnel

The Vermaport® is equipped with the latest technology and control systems and is fully automated with in-built safety and energy saving features

The emergency stop button allows instant shutdown

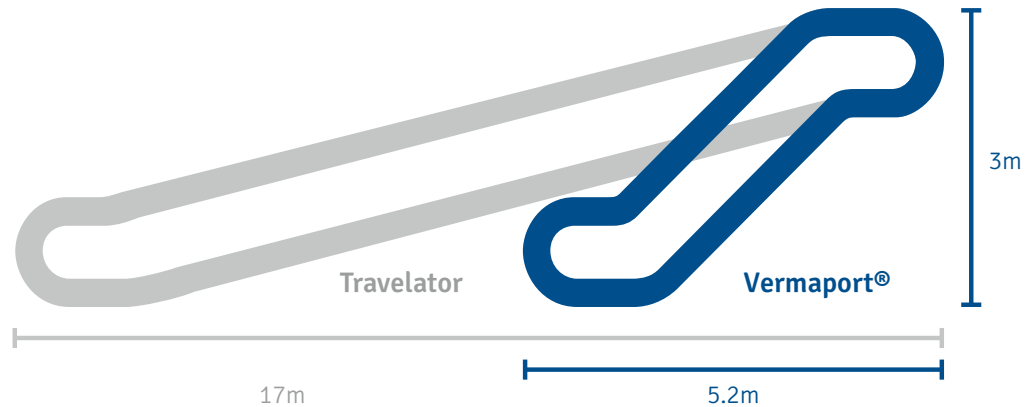

Store staff can easily utilise the Vermaport® for moving stock and packaging between levels

Using a Vermaport® as opposed to a travelator enables you to save around 11.8 m² of space

When retail store space is an issue
the Vermaport® is the solution

Using a Vermaport® as opposed to a travelator
enables you to **save around 11.8 m² of space**

Vermaport® units are sold worldwide and currently we have units in over 35 countries in multiple cities, in excess of 450 units worldwide.

We are also the only supplier for spare parts.
